By Charles E Lucke

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .do not support any weight on the water, their only purpose being to act as bumpers in case a wing attempts to submerge. Wooden Construction. The wing float used on the H16 and F5-L flying boats is an excellent example of good construction, compactness and lightness, coupled with efficient design. A planview of it shows a streamline shape. This float, has the V-shaped bottom with a carefully rounded bow, Fig. 324. The longitudinal members and also the stern post are made of ash. These frames are of three kinds: The one in the middle with the solid diaphragm of veneer, or the watertight bulkhead; others that are rein Fio. 324.--Model H16 wing float. forced by lightened diaphragms of veneer, and still a larger number that are reinforced by veneer in the corners only. For the most part, this framework is fastened together with rivets. The sides...
