Brand New Book ***** Print on Demand *****.While the notion of singularity has a foothold in science (Kurzweil) and philosophy (Nancy, Deleuze, Hardt), the tenets of this theory can be difficult to pin down into one philosophical discourse. This text focuses on how information technology is reaching critical mass, taking center stage in how we live our lives, and calls us to pull from ourselves an inner agency-our own sovereignty. Sovereignty, in this paradigm, is like a self-regulating transit-open when necessary, shielding when needed. It is not invasive (I can not invade you, you can not invade me), and exists without any external authority. But what will sovereignty in singularity look like (aesthetics and role models), and how can such a paradigm exist in an age where mediated information no longer seems credible, and ethical paradigms are not being implemented on the world wide web? The text, which looks at fine arts as a role model for communication, argues for the value of aesthetics as a complex lens to make sense of our world (online and offline) in our sovereignty. ----About the author: Gregory...
