## The Life and Work of George Boole: A Prelude to the Digital Age

By MacHale Desmond

Cork University Press. Hardback. Book Condition: new. BRAND NEW, The Life and Work of George Boole: A Prelude to the Digital Age, MacHale Desmond, This book, aimed at the general reader, is the first full-length biography of George Boole (1815 - 1864) who has been variously described as the founder of pure mathematics, father of computer science and discoverer of symbolic logic. Boole is mostly remembered as a mathematician and logician whose work found application in computer science long after his death, but this biography reveals Boole as much more than a mathematical genius; he was a child prodigy, self-taught linguist and practical scientist, turbulent academic and devoted teacher, social reformer and poet, psychologist and humanitarian, religious thinker and good family man - truly a nineteenth-century polymath. George Boole was born in Lincoln, England, the son of a struggling shoemaker. Boole was forced to leave school at the age of sixteen and never attended a university. He taught himself languages, natural philosophy and mathematics. After his father's business failed he supported the entire family by becoming an assistant teacher, eventually opening his own boarding school in Lincoln. He began to produce original mathematical research and, in 1844, he was awarded...
