Excerpt: .every function in perfect operation, the best results can not be obtained, either with the vital or the mechanical machine. Without heat, water would fail to develop steam, and without combustion there could be no heat. Without water, combustion and heat would be useless; and in the absence of a Boiler there could be no retention of force, and the energy of these elements could not be successfully applied through this particular machine. With no steam-chest, energy could not be concentrated, and in the absence of special machinery the concentrated energy could not be applied for a definite purpose. Steam is the active agency of this design, and without it no possible action can be established in that machine. To return for a moment to the list of elements. combined and activities involved in the steam engine: The objective list is composed entirely of...

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
