

Architectural Acoustics; Or, the Science of Sound Application Required in the Construction of Audience Rooms

By Eugene Henri Kelly

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 edition. Excerpt: .of heat emitted by the light at the side, or on a level with the center of the light, is about one-twelfth of the heat above the light. By holding the thermometer one foot above the light and also at a point one inch from the side of the light the thermometer registered the same number of degrees of temperature in both locations. Tests made with a 16-candlepower incandescent electric light gave a temperature at one inch above the globe equal to the temperature at one foot above a three-foot gas burner, or, in other words, the gas flame emitted from 140 to 160 times as much heated air as the electric light did. At about 16 inches above the electric light the thermometer showed no change or rise in temperature. The results of tests made with the arc electric light of 2, oco-candle-power,...
